

∨KD **DN 65÷100**

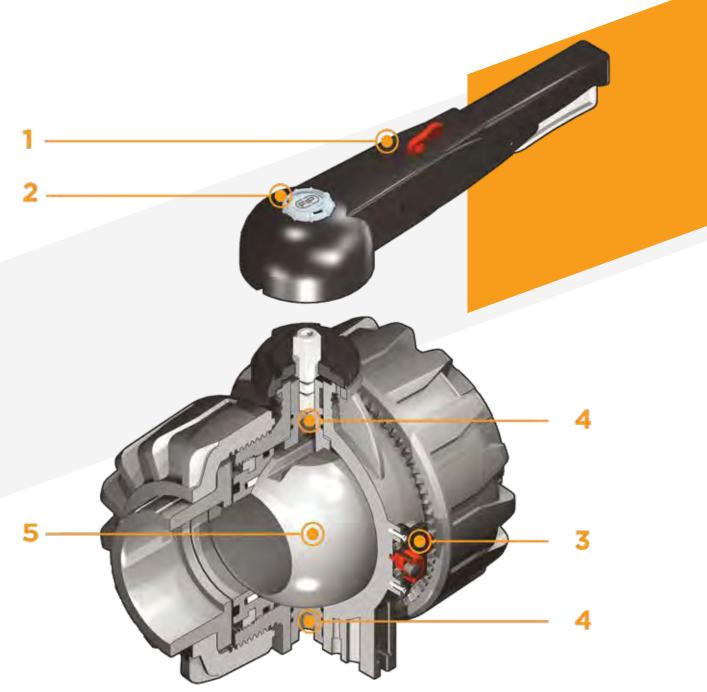

FIP has developed a VKD DUAL BLOCK® ball valve to introduce a high reference standard in thermosplastic valve design. VKD is a True Union ball valve that meets the most stringent needs required by industrial applications. This valve is also equipped with a customisable Labelling System.

DUAL BLOCK® 2-WAY BALL VALVE

- Connection system for weld, threaded and flanged joints
- Patented SEAT STOP[®] ball seat carrier system that lets you micro-adjust ball seats and minimise axial force effects
- Easy radial disassembly allowing quick replacement of O-rings and ball seats without any need for tools
- **PN10 True Union valve body** made for PP-H injection moulding equipped with built-in bores for actuation. ISO 9393 compliant test requisites
- Option of disassembling downstream pipes with the valve in the closed position
- Full bore ball with high surface finish
- Integrated bracket for valve anchoring
- Possibility of installing a gear box or pneumatic and/or electric actuators by applying an ISO standard bore PP-GR flange
- STAINLESS steel co-moulded stem, with square section as per ISO 5211
- Possibility to have handle with integrated LSQT limit micro switch, even as a retrofit in existing installations

Technical specifications	
Construction	2-way True Union ball valve with locked carrier and union nuts
Size range	DN 65 ÷ 100
Nominal pressure	PN 10 with water at 20° C
Temperature range	0 °C ÷ 100 °C
Coupling standards	Welding: EN ISO 15494. Can be coupled to pipes according to EN ISO 15494
	Thread: ISO 228-1, DIN 2999
	Flanging system: ISO 7005-1, EN ISO 1092-1, EN ISO 15494 EN 558-1, DIN 2501, ANSI B.16.5 cl.150
Reference standards	Construction criteria: EN ISO 16135, EN ISO 15494
	Test methods and requirements: ISO 9393
	Installation criteria: DVS 2202-1, DVS 2207-11, DVS 2208-1, UNI 11318
	Actuator couplings: ISO 5211
Valve material	PP-H
Seal material	EPDM, FKM; PTFE (ball seats)
Control options	Manual control; electric actuator; pneumatic actuator

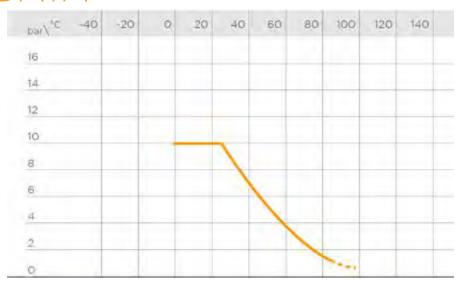

- 1 HIPVC ergonomic multifunctional handle for quick operation, lock and graduated adjustment in 10 positions. Possibility of inhibiting rotation with a lock
- Customisable Labelling System: LCE module made of a transparent protection plug
- and **customisable tag holder** using the LSE set (available as accessory). The customisation lets you identify the valve on the system according to specific needs
- JUAL BLOCK® patented lock system that ensures union nut tightening hold even in severe
- conditions such as vibrations or heat dilation
- 4 Double stem with double O-Rings for ball centring and operating torque reduction
- 5 Machined high surface finish ball that guarantees a smooth operation and increased reliability.

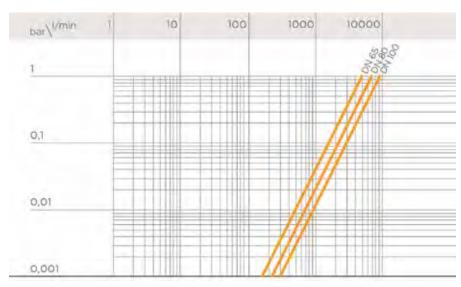

TECHNICAL DATA

PRESSURE VARIATION ACCORDING TO TEMPERATURE

For water and harmless fluids to which the material is classified as CHEMICALLY RESISTANT. In other cases, a reduction of the nominal PN pressure is required (25 years with safety factor).

PRESSURE DROP GRAPH

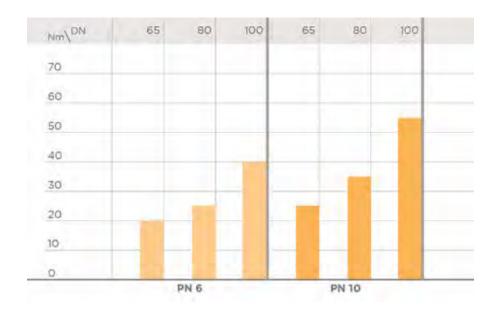

K_v100 FLOW COEFFICIENT

The $\rm K_v 100$ flow coefficient is the Q flow rate of litres per minute of water at a temperature of 20°C that will generate $\Delta p = 1$ bar pressure drop at a certain valve position. The Kv100 values shown in the table are calculated with the valve completely open.
